Operating modes

Oven functions

These functions apply to oven with a single large section only.

Symbol	Name	Description
	Static (Top and bottom heating)	Top and bottom heaters are in operation simultaneously. Cook with one tray only.
	Bottom heating	Only bottom heater is in operation. It is suitable for pizza and for subsequent browning of food from the bottom.
	Static fan (Fan supported bottom/top heating)	Top heater, bottom heater plus fan (in the rear wall) are in operation. Hot air is evenly distributed throughout the oven rapidly by means of the fan. Cook with one tray only.
	Defrost (Fan operated)	The oven is not heated. Only the fan (in the rear wall) is in operation. Suitable for thawing frozen granular food slowly at room temperature and cooling down the cooked food.
	Fan assisted cooking	Only the fan heater in the rear wall is in operation. Hot air heated by the fan heater is evenly distributed throughout the oven rapidly by means of the fan. In most cases, preheating is not required.
	Top Heater and fan (Fan assisted top heating)	Top heater and the fan at the rear wall are in operation. Hot air is distributed better with fan compared to the situation where only top heating is in operation.
	Pizza	Bottom heater and the fan assisted heater (at the rear wall) are in operation simultaneously. Suitable for baking pizza.

Symbol	Name	Description
	Multi "3D" cooking	Top heater, bottom heater and the fan assisted heater are in operation simultaneously. Cook with one tray only.
	Economic grill	Only the inner section of the top heater at oven ceiling operates. Suitable for grilling small and medium sizes of meat.
	Full grill	Inner and outer sections of the top heater at oven ceiling are in operation simultaneously. Suitable for grilling medium size meat pieces.
	Grill + Fan (Fan supported grill)	Rear wall fan operates along with the inner and outer sections of the top heater at oven ceiling. Hot air is evenly distributed throughout the oven rapidly by means of the fan. Suitable for grilling medium size meat pieces.
	Warm keeping	Used for keeping food at a temperature ready for serving for a long period of time. Do not use for cooking food.
	Eco fan cooking	Only the fan heater in the rear wall is in operation. To save power, you can use this function instead of the cooking operations that you would perform by using Fan Heating at 160-220C temperature range. But, the cooking time will increase a little bit. Cooking times related to this function are indicated in "Eco Fan Cooking" table.
	Low temperature cooking	Food is heated simultaneously from the top and bottom. It is suitable for slow-cooking of roasted/seared pieces of meat (veal, lamb, poultry etc.) in an open container at low temperature. This function ensures that the meat is juicy and soft on the inside. Please use hygienically suitable types of meat. On the hob, grill etc., pre-roast/sear all surfaces of the meat in a hot pan. You can cook the pre-roasted/seared meat with the "low temperature cooking" function for a long time. Cook with one tray only.

Function table indicates the functions that can be used in the oven and their respective maximum and minimum temperatures. Recommended temperature is displayed when the function is selected.

- Functions may vary depending on product model.
- While making any adjustment, related symbols will flash on the display.
- Program will be cancelled in case of power failure. You must reprogram the oven.
- Current time cannot be set while the oven is operating in any function, or semi automatic or full automatic programming is made on the oven.
- Even if the oven is switched off, the oven lamp lights up if the door is opened.
- Due to safety reasons, maximum time that can be set for "Cooking time" is limited with 6 hours at all positions apart from "Warm Keeping" and "Low Temp. Cooking" functions.
